WinPC-NC...?
*...*How does it work?

Update to the latest version

X	Starter
X	Light
X	USB
X	Professional

These brief instructions describe how to keep *WinPC-NC* always up to date and how to load a new version on occasion.

Scenarios:

Our team is constantly engaged in providing high technical standards by technological innovations and development and by integrating new functions in *WinPC-NC*. Furthermore we take great care to spot and rectify any potential technical defects or insufficiencies. Each new version is clearly marked by a special number, e. g. 3.00/37 means version 3.00 with revision status 37.

At any time, a short press on *„About WinPC-NC"* in the help menu allows you to display the current version and revision status, as well as the date of publication.

In assisting all users to keep their installation up to date, we provide updates for download. Please use the public download section on our homepage **www.Lewetz.de/en**.

Update to current program versions

This ZIP files include the current *WinPC-NC* program files as well the updater program. It can be run at systems where *WinPC-NC* is already installed and running. It does not substitute a complete and full installation. Please follow the README file for detailed steps. If you want to update your *WinPC-NC Light* licence please contact us by mail.

The here placed updates are only usable with a pre installed and runable version. They did not replace a full installation.

Aktuelle Versionen / Current versions

	Version 3.0		Version 2.5	
WINPCNC.EXE	3.02/02	22.1.2019	2.50/41	20.01.2019

Step 1: Download of the appropriate update package

In this section you can download the appropriate update package which is ready for further use after being saved on the computer.

Please note:

These updates are solely practicable within the major version.

Example:
older version 2.10/xx   to   current version 2.50/41
older version 2.50/13   to   current version 2.50/41
older version 3.00/xx   to   current version 3.02/02
older version 3.00/07   to   current version 3.00/36

**Updates to the next major version are not practicable.**

Example:
Older version 2.50/30   to   current version 3.02/02   not possible
**Please contact us by mail for more information**

Step 2: Unzip and copy new files

Open the loaded and saved ZIP file, mark all files and copy them into the clipboard.

Thereafter locate the directory of *WinPC-NC*, e. g. to **C:\WinPC-NC_USB** and add any files of the clipboard. This is easily done by a right mouse click. Then activate the button "*Paste*" *...*

All new files registered in the update archive should now be found and displayed in the *WinPC-NC* directory. If you are overwriting files, the security prompts can simply be confirmed.
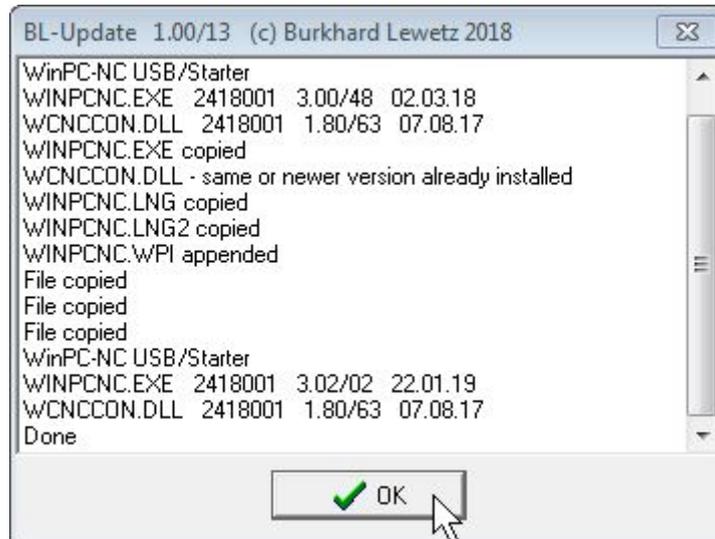

The automatic update process is started by executing the file **BLUPDATE.EXE** via double click with the mouse. The process status and single actions are displayed in a small dialog box and the entire process is recorded in a log file called **BLUPDATE.LOG**.

The successful update process is displayed in the dialog box and the program is automatically closed.

```
BL-Update 1.00/13  (c) Burkhard Lewetz 2018                    ▣
WinPC-NC USB/Starter
WINPCNC.EXE   2418001   3.00/48   02.03.18
WCNCCON.DLL   2418001   1.80/63   07.08.17
WINPCNC.EXE copied
WCNCCON.DLL - same or newer version already installed
WINPCNC.LNG copied
WINPCNC.LNG2 copied
WINPCNC.WPI appended
File copied
File copied
File copied
WinPC-NC USB/Starter
WINPCNC.EXE   2418001   3.02/02   22.01.19
WCNCCON.DLL   2418001   1.80/63   07.08.17
Done

                    ✔ OK
```

This log file presents the older stored version 3.00/48 as well as the new version 3.02/02. Any amendments, extensions and bug fixes are described in the file *NewVersion.pdf*.

Please note:

Due to this update process only new program files are loaded and the older files are replaced.

Settings and parameters remain unchanged. The same applies to licence and licence file.
