

Help for editing the language file

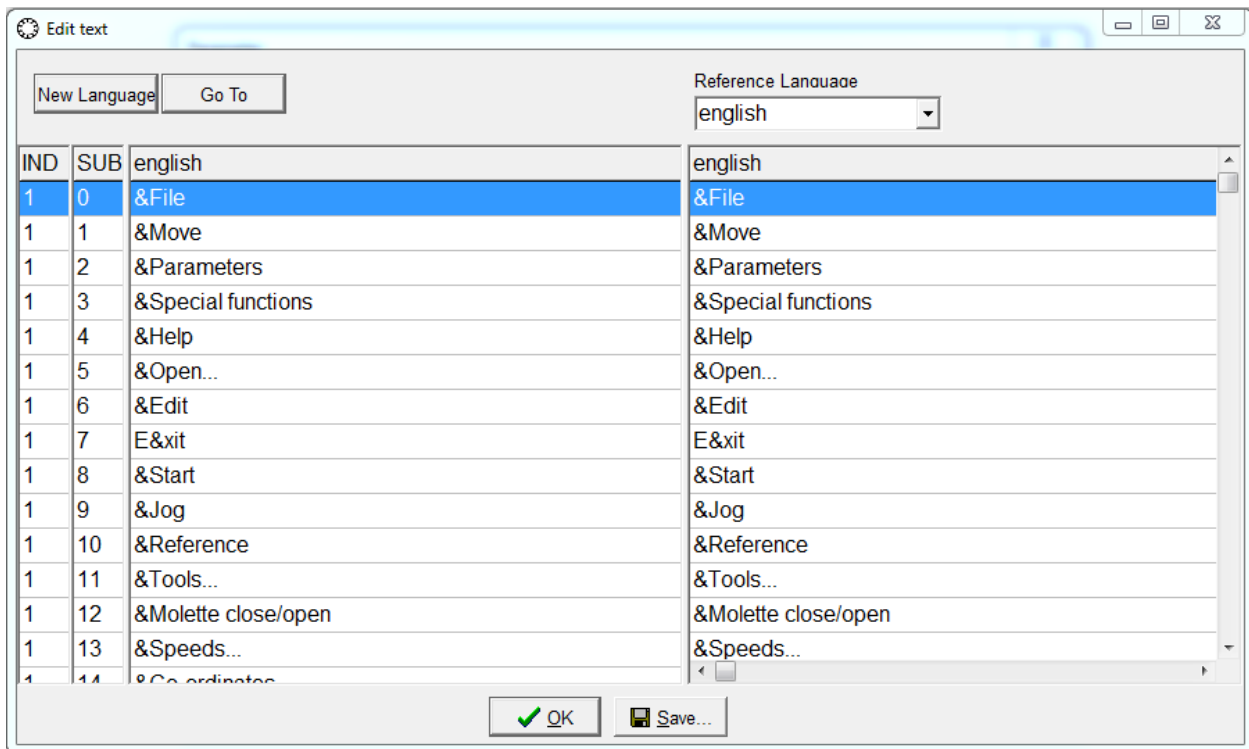

Bild 2

The left part of the table shows the texts of the selected language (Picture 1).

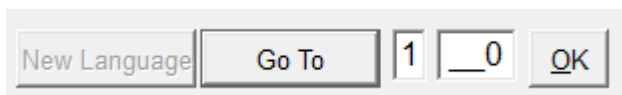

These texts you can edit.

The right part of the table shows the corresponding texts of the so-called „Reference language“. This „Reference language“ you can select in the dropdown above.

The texts of the „Reference language“ are read only..

Before each line you see the Index and Subindex associated to the text.

If you want to „Go to“ directly to a special textline, you can do this by pushing the button „Go To“.

You can enter the Indexvalue in the first and the Subindexvalue in the second input field. Push „OK“ and the desired textline will be selected..

If you want to add a new language to the languagefile you can do this by pushing the „New Language“ button

Following menu is displayed:

A screenshot of a software dialog box. On the left is a button labeled "New Language". To its right is a rectangular text input field. Further right are two buttons: "OK" and "Abort". The dialog box has a light gray border and a slightly darker gray title bar area.

In the input field you can set the name of the new language.
Pushing „OK“ will fill the left part of the table (new language) with the texts of the „Reference language“.

You can now change the texts according to the new language.

If you want to save the changes push the „Save“ button.

You close the edit mode by pushing the „OK“ button.
