

## Basic settings Display/Operation

Parameter Basic settings Display / Operation

## Language

**WinPC-NC** is multilingual. The standard version already includes a few languages, and additional languages can easily be bolted on if required. The available languages are listed in a menu t.

According to the status of January 2016 following languages are available or will become available shortly:

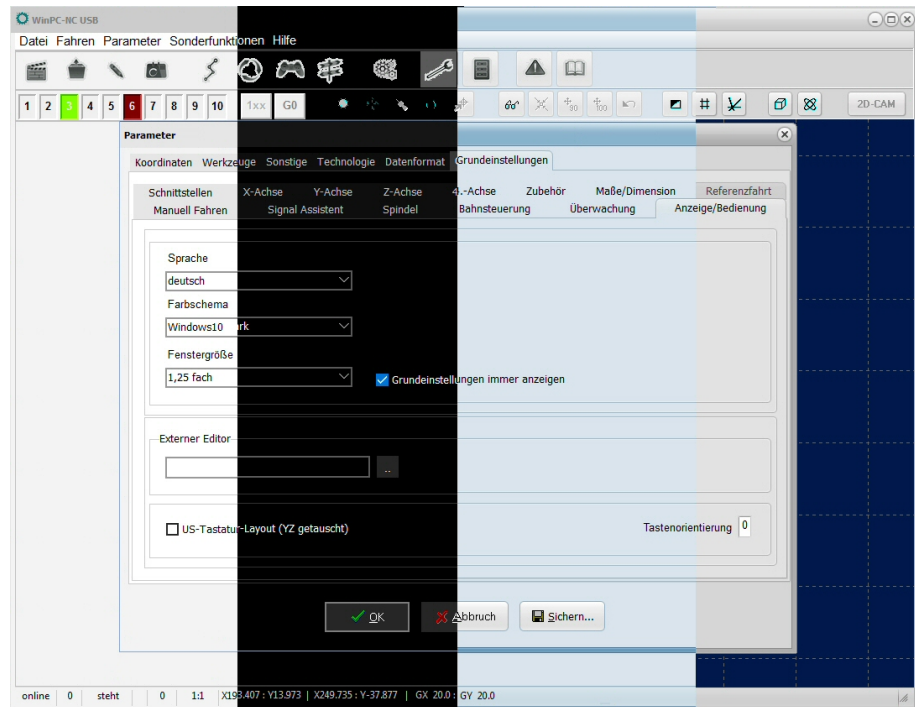

germian	dutsch	croatian
English	czec	chinese (Taiwan)
french	mazedonian	chinesisch (traditional)
spanish	slovenian	serbian
polish	italian	turkish
hungarian	portoguese	bosnian
greek		

---

**The language changeover takes place as soon as you select a new language and click Save. Some text phrases are available with certain country drivers in Windows only.**

---

## Color scheme

WinPC-NC with four various styles

**WinPC-NC** has more different styles for the user surface. With this setting are 11 different styles selectable.

## Windows size

In **WinPC-NC** font and window size can be adapted step by step by this parameter. Independently the main screen can be zoomed as required by mouse as it is standard in Windows.

## External editor

**WinPC-NC** is equipped by a simple text editor to load, view and modify nc files. If you need a different more enhanced or a well know editor you can easily define the name and path of a new program in this setting.

## US keyboard layout (switch YZ keys)

In manual jogging you can easily move axes by pressing the (X) or (Y) or (Z) key and in combination with (Ctrl) key you even can move faster. As a difference between european and american keyboard layout the (Y) and (Z) keys are switches which makes it extremely difficult to move the machine. By checking this check-box **WinPC-NC** automatically corrects the switched key layout.

---

## Button orientation

*Adapting the movement direction of the buttons*

It is possible to use 4 settings to rotate the X and Y-axis directions through 90 degrees at a time in order to adapt the orientation of the movement buttons in JOG MODE to take account of the machine orientation.

Position 2 and 3 are turning the X-Y-keys by 90 degree each:

## Constant display of basic settings

Basic settings are not hidden in the normal parameter dialog.

## Profile selection when starting

Induces **WinPC-NC** to execute profile selecting each time when the system is started.
